DOCUMENTATION GUIDE #3:
RESPONDENT IDS AND MISSING CODES

Respondent ID Codes

The following table shows the reasoning behind the respondent ID numbers.

Table 1. Respondent ID Codes	
100000-399999	Randomly Selected Women, 2009
5000000-5999999	Randomly Selected Men, 2009
6000000-6999999	Male Partners Enrolled During TLT-1 (2009-2011)
9000-9999	Refresher-Sample Women Enrolled in 2012
7000000-7999999	Male Partners Enrolled during TLT-2
400000-499999	Randomly Selected Women Enrolled in 2019

Missing Codes

Missing responses were recoded to indicate the reason for the lack of response. Responses were marked as either missing when no response was provided or the respondent refused to answer, skipped when the respondent was not meant to receive a question/the question was no applicable, or don't know when the respondent indicated that they did not know the relevant information. The logic behind the missing codes is shown in Table 2.

Table 2. Missing Codes	
.m	Missing
.s	Legitimate Skip
.d	Don't Know
